SUPER HYLAM **THE BRAND STORY**

A brand's success rarely comes from the idea, it comes from the founding team's never-say-die attitude and relentless execution.

The foundation of Super Hylam is its strong vision and efforts of its team members backed by founders who are motivated self-starters having years of experience in lifestyle surface decor industry.

FROM THE DESK OF DIRECTOR

Super Hylam (P) Limited is more than a business entity; it's the source of inspiration for all our valued customers. Customers are now the center of the business. We believe in partnership that brings the customer and supplier together in a more effective relationship.

We inspire and promote excellence in manufacturing high quality laminates.

NARESH GUPTA

Since 1994 Super hylam has been manufacturing high quality laminates. Our process and services are executed in a safe, timely, Value added and cost effective manner that meets customer satisfaction.

Technology not only creates new products but also change consumer behavior. The competition may be sometimes hard, it is best for any individual because it ensures survival of the fittest.

Innovation and flexibility to change are going to be a key in the future.

" If you want to succeed you should strike out on new paths, rather than travel the worn paths of accepted Succeed"

WHO ARE WE?

Super Hylam Pvt. Ltd. is an ISO 9001:2008 quality management, ISO 14001:2004 environment management, ISO 18001:2007 Health and Safety Management Certified Company. It was started in 1994.

HIGH PRESSURE DECORATIVE LAMINATES

It is made of resin impregnated cellulose layers, which are consolidated under heat and high pressure.

The various layers are described below:

- Overlay paper, which serves to improve the abrasion, scratch and heat-resistance.
- Decorative paper, which defines the design and is composed of coloured or printed paper.
- Kraft paper, which is used as core material and control product thickness.

INDUSTRIAL LAMINATES

Bakelite or industrial laminates was developed by the Belgian American chemist Leo Baekeland in 1907. It is formed from thermosett resins such as condensation reaction of phenol with formaldehyde.

Its one of the revolutionary product due to its electrical non conductivity and heat resistant properties.
